Security at a glance: How Australian businesses are responding to rising cyber risks

Insights from The Global State of Information Security® Survey 2016

In the last 12 months, the number of detected security incidents increased

Increased spending means that the capability to detect incidents may also have increased

Security budgets are on the rise

Australia's security spend of overall IT budget = **4.02%**

Global average **= 3.75%**

What are the top security priorities for Australian organisations?

boost from **2015**

Cloud computing

27% 18% Australia

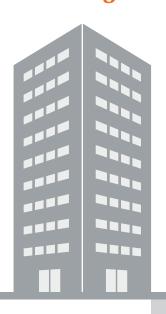

Organisations are chasing innovative solutions and lower cost alternatives.

Boards are more involved in cyber security

Locally, there is a strong focus on implementing security leadership. **23%** of Australian organisations already have or will implement a **Chief Security** Officer (CSO) role to drive security in the next 12 months.

Australian organisations acknowledge there are still significant issues:

- **Third party suppliers** who is keeping tabs on shared information?
- **The speed of innovation** is security keeping up with the rate of adoption of new technology?
- Response protocols and disaster preparedness - is there a robust response plan in place?
