

Turn strategy into success with SAP-driven finance transformation

Start your transformation today and go live with confidence

PwC offers tailored solutions to help clients accelerate their journey to SAP S/4HANA and Cloud ERP:

Discovery and strategy phase

Cloud ERP assessment (3-Day Complimentary Service)

- Assess IT landscape, readiness, and potential benefits of SAP S/4HANA Public Cloud
- Deliver a current-state diagnostic workshop to identify improvement areas

Current state diagnostic workshop

- Conduct a comprehensive assessment of the client's digital ecosystem, business processes, and technology landscape
- Identify gaps, inefficiencies, and opportunities for automation and improvement
- Deliver a diagnostic report with key findings and an implementation roadmap

S/4HANA case for change

- Define a business-driven transformation roadmap tailored to client needs
- Leverage PwC's experience from 2,000+ S/4HANA implementations
- PwC's S/4HANA Business Case Accelerator brings industry leading practices to accelerate time to value

Implementation and deployment phase

Transform finance operations and compliance with S/4HANA

- Fast track design with PwC's pre-configured SAP Industry Edge solution
- Reduce deployment risk with tried-and-tested PwC project delivery framework

Establish future fit Chart of Accounts

- Utilise PwC's Chart of Accounts analyser to identify areas for improvement in current CoA
- Design future state Chart of Accounts & Enterprise Structures to leverage standard S4

Develop future state operating model and capabilities

- Develop future state Op Model leveraging Agentic workforce to build efficiencies in your team
- Develop future capabilities required to enable your teams to grow, scale and develop in technology

Optimisation and governance phase

Data, analytics and reporting

- Improve reporting structures for better stakeholder decision-making
- Develop real time reporting and analytics to support your organisation to deliver real value

Maximise S/4HANA ROI with Signavio and BTP innovations

- Enhance decision-making through AI models developed for forecasting and demand planning
- Optimise business processes through intelligent automation
- Accelerate innovation through low-code/no-code application development

Empower your operations with tailored SAP support services

- Utilise advanced analytics to continuously refine system performance
- A robust support framework for timely issue resolution
- Enhance functionality with tailored add-ons and upgrades
