

PwC's S/4HANA Case for Change

Many organisations can be forgiven for thinking along these lines. If only migrations were that straightforward!

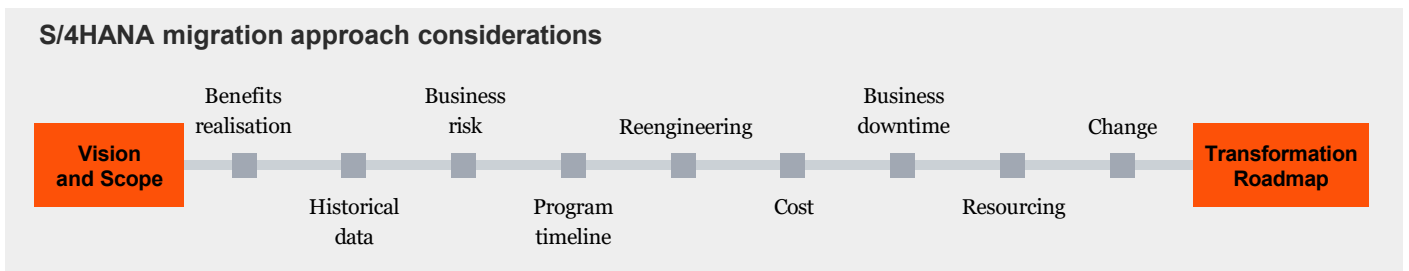

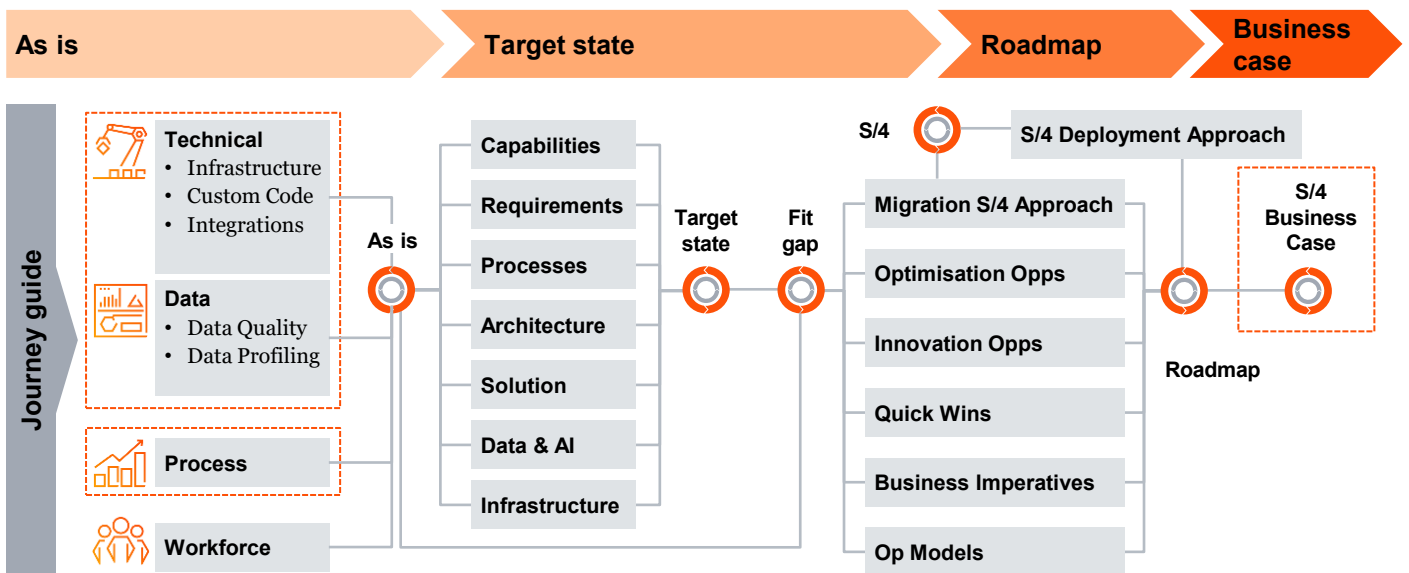

A new version of the ERP, you say? Great, let's just flip the switch. It can't be that difficult, can it?

Framework

Through our experience in almost 2,000 S/4HANA implementations worldwide, we have developed a proven approach to supporting clients with their hardest questions on their journey to S/4HANA – 'When do I move to S/4HANA?', 'How do I move to S/4HANA?' and 'What Benefit will I get from moving to S/4HANA?'. Our proven methodology will expedite your journey from defining the target state, the roadmap and the business case for change.

We've supported our clients in working through numerous challenges that arise in making the case for change to S/4HANA

There are many challenges and roadblocks that organisations face in getting the appropriate buy-in and support for an ERP migration program. Our approach and experience has helped hundreds of our clients develop an ERP roadmap and strategy that is fit for purpose for them.

We have numerous tools and accelerators that can accelerate your Case for Change and deliver a path to S/4HANA that has alignment between both IT and the Business

It is important in our experience that a detailed assessment of the legacy ECC environment is performed. We recommend a combination of tools and accelerators to expedite this process as part of your case for change.

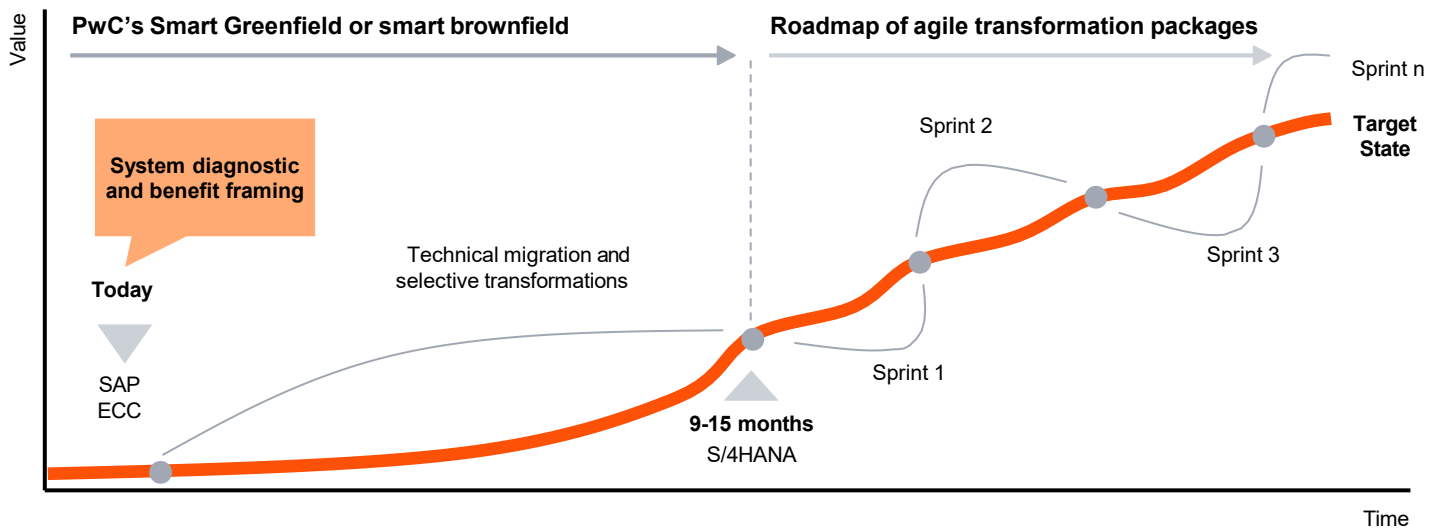

Smart Greenfield

Transform at your pace in a modular and agile way

Smart Greenfield is an **advanced transformation approach** engineered to streamline the migration journey from SAP ECC to SAP S/4HANA, aimed at reducing risks, accelerating timelines, and optimising expenditure. This method is characterised by a meticulous and selective approach to system design, prioritising the standardisation, harmonisation, and simplification of your organisation's processes and data architecture. By leveraging **PwC's IndustryEdge**, it integrates proven best practice business processes tailored to your industry, alongside preconfigured S/4HANA solutions where appropriate.

Furthermore, Smart Greenfield **empowers organisations to retain their current business processes** and functional configurations from ECC that are still effective and aligned with operational needs. This flexibility ensures continuity and minimises disruption during the transition to S/4HANA, allowing businesses to optimise their existing investments while strategically adopting new capabilities offered by the latest SAP platform. This holistic approach not only enhances efficiency but also fosters agility, enabling organisations to adapt swiftly to evolving market demands and technological advancements.
