

Swift.MV

Does your business have a fleet of vehicles?

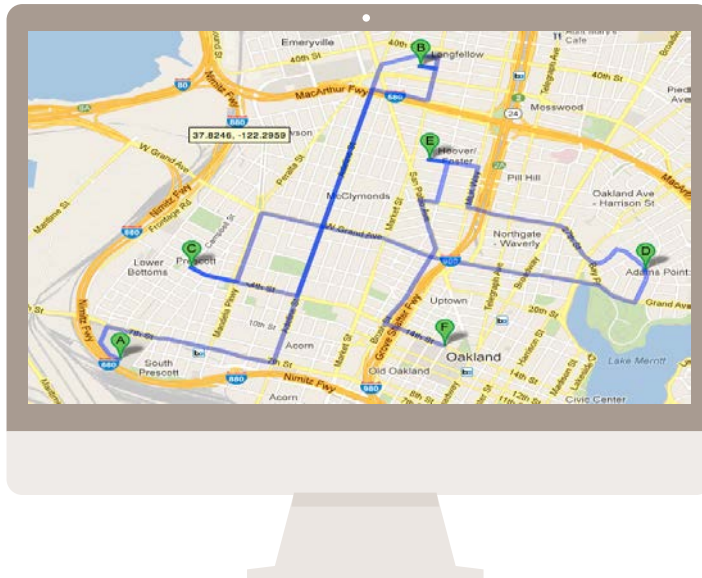

Is the compliance burden of logbooks and statutory declarations frustrating?

Do you use the statutory method for FBT?

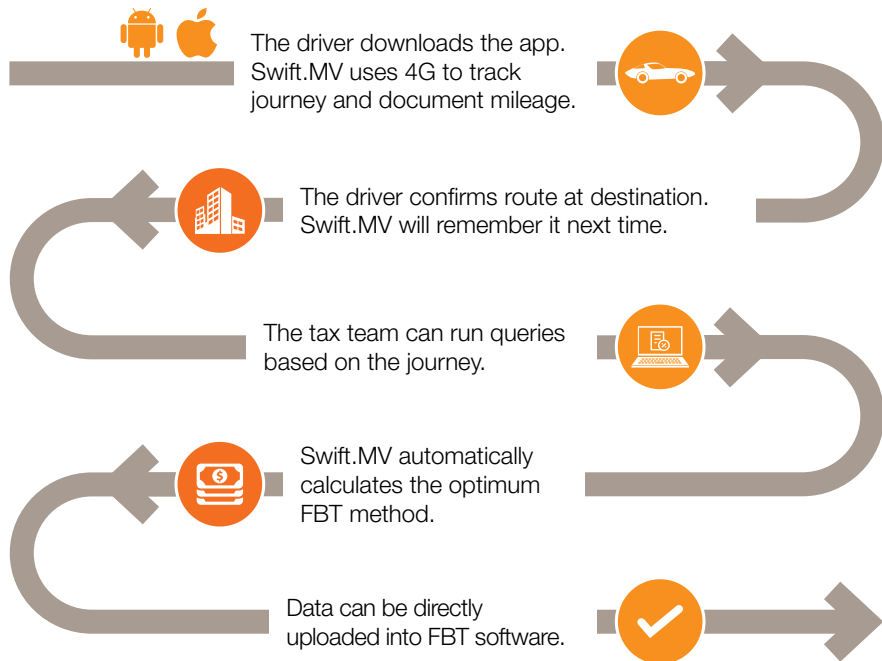

About Swift.MV

Swift.MV for motor-vehicles securely and privately tracks your fleet of vehicles to automate the generation of your company's FBT logbooks and associated compliance requirements. Swift reduces the burden of ensuring you are electing into the most advantageous FBT methodology on an on-going basis, so you save on unnecessary costs.

How it works

Cutting edge technology

Developed by PwC's Enterprise Digital team, Swift.MV leverages GPS and 4G technology to track details of your routes through a secure portal. Coupled with an easy to use app for employees, the technology learns route information based on feedback which reduces the compliance burden over time – saving time and money. The entire process is secure and private, only displaying information relevant to the preparation of FBT and to ensure you are FBT compliant with ATO guidance.

Swift for motor vehicles

- Increase your compliance assurance – **90% more reliance**
- Easy to install – **iPhone and Android compatible**
- No more manual forms and emails – **65% average hours saved**
- Potential for cash tax savings – **33% tax saved**

SWIFT.MV

Reduce the burden of FBT compliance by automating reporting requirements
