

Multi-country payroll service delivery model

Our multi-country service delivery model provides organisations with strong relationships and governance of the overall automated payroll process and software solution. Centrally coordinated by PwC Australia, you benefit from local expertise of our in-country payroll and tax specialists with specific country payroll processing systems to interface for statutory lodgements.

The PwC Global Payroll Platform (GPP) is a proven and scalable solution that has been developed with our specialist payroll and tax knowledge. The GPP delivers a holistic and consistent approach to connect and manage multi-country payroll operations and end-to-end payroll compliance.

Our service delivery model is flexible and scalable, and we continually look for opportunities for improvement and enhancement to meet specific multi-country payroll needs of global organisations.
