

Advisor Connection Briefing

PwC's Advisor Connection is aimed at supporting partners in accounting practices. It provides you with access to your own dedicated team and a network of PwC advisors who can support you on specialist issues affecting your key clients.

Glen Frost and Justin Grealy,
Partners in PwC's Private Clients team, will introduce you to the value provided by our Advisor Connection program and then take you through several case studies that could apply to your key clients. We also provide you with an opportunity to network with other accounting practice owners.

This session is part of a series to deliver on our promise to provide value to our Advisor Connection members by:

- Providing an intimate forum for you to focus on your most valuable clients
- Sharing case studies that you can work through with your key clients
- Networking with other accounting practice owners.

The session will introduce you to our Advisor Connection program and cover the following topics, aimed at highlighting examples of ways we have recently helped Advisor Connection members:

- **Tax policy: State of play** – Following the Australian Federal election on 18 May 2019, we will share our insights on how the election outcome is likely to impact families and private businesses given the differences in proposed tax policies of the two major political parties.
- **Year round planning** – Key issues to cover off during the year and pre-30 June, including:
 1. Recap on recently enacted legislation, including those proposed to be effective from 1 July 2019
 2. Trust compliance (including consideration of UPE's)
 3. SME's and Base rate entity rules
 4. ATO focus areas
 5. Distributions of profits from private groups
